# Two studies of temporal reach

*An adult records request meets an open-ended future restriction.*

## HOW IT IS EARNED

A person- or case-specific determination is extended into an open-ended future access outcome, beyond the request being answered, without a disclosed coverage bridge to later-identified data.

## TRACKS LEFT BEHIND

PLPD-SUBJ-IDX-DR-001 asked for Sean-only index data. Bisek's October 5 response announced child-data withholding "until further notice," including associated metadata and derivatives.

## EXACT SOURCE PAIR

September 18 subject-index request, opening and scope; October 5 response, Important Considerations. Response Gmail: 1a10e76096181355. Event: PLPD-OCT05-PROSPECTIVE-SWEEP.

## PROOF LIMIT - KEEP THE JOKE HONEST

The response does not disclose a prospective coverage map; this does not prove that none exists. A lawful bounded determination may cover later requests. No future request is deemed denied here. No child statements or assault details are included.
