

SOMETHING IS DIRECTING THE FAUNA

A veteran AAG has entered the clearing. The paperwork has begun to move.

CONFIRMED SIGHTING

FAUNA ACTIVE

MECHANISM UNKNOWN

RESPECTFUL SATIRE - NO AWARD

FIELD INTERPRETATION: Maroon threads descend from an unresolved institutional shadow. They stop short of attachment. That is the joke and the proof limit.

THE SIGHTING. On August 20, 2026, Assistant Attorney General Martha J. "Marty" Casserly sent the authenticated 27-012C email identifying herself as counsel for MDE. The complete 38-page complaint traveled with it. At once, the Clumsy Fox shouldered a file, the Quantum Parrot found two answers, the Predicate Pickpocket reached for a clause, and the Finality Boomerang began its familiar return arc.

SIGHTING CONFIRMED. LITERAL PUPPET STRINGS NOT CONFIRMED.

Explorer protocol: admire the professional, audit the route, and keep your hands inside the record universe.

WHY THE FAUNA STIRRED

Casserly's email is a real sighting and a legitimate bestiary trigger: an experienced state lawyer entered a live complaint lane and the record immediately presented familiar fauna behaviors - overstuffed files, mutable predicates, doubled answers, and looping finality. That is a satire about bureaucratic patterns, not a claim that she committed wrongdoing or literally controls MDE, PLSAS, or any creature.

KEEPER'S CAUTION

What is proved: Casserly sent the email, identified herself as MDE counsel, visibly routed it to Sean O'Brien and Michelle Cuka/PLSAS, and attached the full complaint. What remains unresolved: recipient capacity, selection of recipients, authority, purpose, minimization, endpoint access or use, and whether any institutional mechanism coordinated later fauna. Respect the advocate. Audit the institution.

She appears to be very good at her job. Tragically, the explorers are standing on the other side of the map.
